

PUBLIC NOTICE

CITY OF FORT LAUDERDALE TO CHLORINATE WATER SYSTEM Preventive Maintenance Scheduled for March 22 - April 12, 2022

The City of Fort Lauderdale will temporarily switch to using free chlorine in its drinking water system beginning at 9 a.m. on Tuesday, March 22, 2022, through 9 a.m. on Tuesday, April 12, 2022.

Free chlorination is a common preventative maintenance procedure for water systems using chloramines for disinfection. The City expects the chlorination period to be transparent to our neighbors; however, some may notice a slight change in the taste or smell of their tap water. In addition, neighbors may see fire hydrants running in their neighborhoods, which is part of the normal maintenance process.

This procedure will affect the City of Fort Lauderdale, as well as Lauderdale-by-the-Sea, Port Everglades, Village of Sea Ranch Lakes, Wilton Manors, and sections of the Town of Davie, Oakland Park, and Tamarac (east of State Road 7/441).

The City of Wilton Manors receives its potable water from Fort Lauderdale through the Fiveash Regional Water Treatment Plant. If you have any questions regarding the free chlorination process, please contact the City's Emergency Management/Utilities Department at 954-390-2190.

Flushing fire hydrants is a routine part of the free chlorination process.
