

Life's Just Greener Here

City of Wilton Manors

Sea Level Rise Vulnerability Assessment Steering Committee

Agenda

Steering Committee Meeting #1

January 19, 2023 | 4:00 p.m.

Welcome	Mayor Scott Newton
Self Introductions	Committee
Opening Remarks	Pamela Landi
Job Description	Pamela Landi
Review of Materials	Jeffrey G. Hiscock, Baxter & Woodman
Roundtable Discussion	Committee
Next Steps	Pamela Landi
Review meeting Dates	Committee
Adjournment	

Committee Members

Name

Rebecca Bradley, *Cadence*

Alec Bogdanoff, *Brizaga Engineering*

Hope Calhoun, *Dunay, Miskel and Backman PA*

Ron Falk, *Wilton Manors Business Association*

Bert Fisher, *Wilton Manors Utilities Department*

Tim Hernandez, *New Urban Communities*

Andrew Riddle, *Metropolitan Planning Agency*

R. David Walker, *Audubon Society*

Discipline

Landscape Architect

Environmental Engineer

Land Use Attorney

Realtor

Assistant Director

Development

Transportation Planning

Biodiversity Scientist

Student Members

Ginou Charles, *12th grade*

Sara Ellis, *12th grade*

Aidan Herrero, *8th grade*

Cali Myers, *6th grade*

Danni Shepard, *6th grade*

Fort Lauderdale High/MODS intern

Fort Lauderdale High/MODS intern

Somerset Academy Village

St. Mark's Academy

Wilton Manors Elementary

Guiding Principles Draft January 2023

Wilton Manors has established guiding principles for the work related to the SLR VA. These are common tenets that should frame the city's future growth and development. CRP guiding principles frame the analysis and recommendations geared to diverse aspects of community vulnerability, including socio-economic, environmental, real estate, and infrastructure considerations.

Steering Committee Mission

Steering Committee members will represent a variety of perspectives and may include public officials, members of the business community, technical experts, coastal scientists, and representatives of local special interest groups. In addition to providing guidance, steering committee members will work directly with the grantee so that components of the planning process and of the VA follow professional standards and reflect community specific needs.

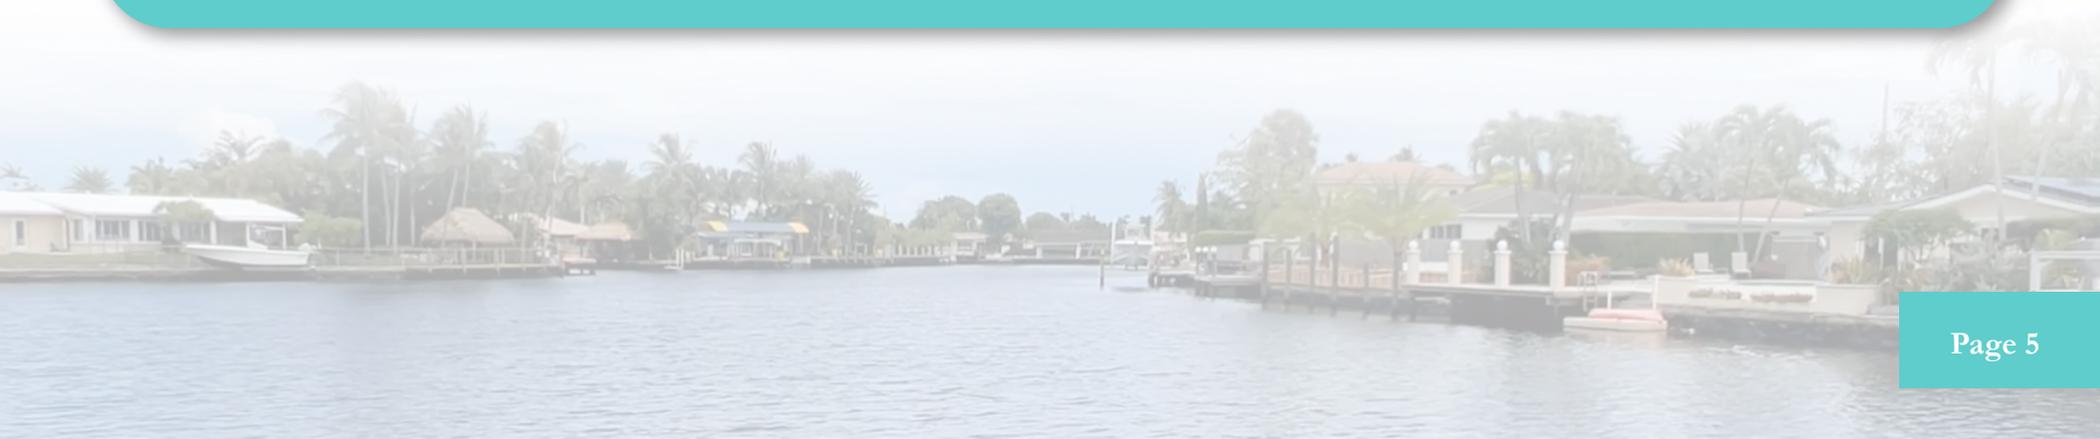

Partnership & Collaboration

Climate change and its impacts do not stop at municipal borders, and the adaptation of one community can be strengthened or weakened by actions in another. The City will continue to coordinate climate adaptation efforts across neighboring jurisdictions, consider public investments/initiatives, and examine opportunities for public-private partnerships.

Infrastructure & Built Environment

Strategies to protect the built environment will incorporate the best available climate science and projections from the Southeast Florida Regional Climate Change Compact. Climate projections and adaptation strategies will be determined on a time horizon relevant to the lifespan and criticality of the asset(s) in question. The City recognizes that adaptation should balance engineering solutions, including nature-based strategies, and other long-term planning strategies. The City will identify and use science based targets (SBT) and adaptation action areas to prioritize public investments and limit new development in areas most vulnerable to climate impacts.

Economy

Adapting to climate change is essential to the city's economy. Where economic development is appropriate, it will be accomplished in a manner that protects, maintains, and enhances coastal resources, the built environment, historic sites, and tourism. It will also respect local land development regulations.

Natural Environment

Policy development will consider climate change impacts based on the best available science and aim for the highest possible level of protection of natural resources, biodiversity, natural systems, and environmental quality. Strategies identified within the Adaptation Action Areas will allow for green or planned open space, protect and possibly expand habitats, and reduce or mitigate sources of pollution.

Social Equity

Adaptation and resilience strategies must protect human life, public and private property, and cultural resources from climate change impacts. Actions should be prioritized with consideration to economic and social vulnerability to ensure that climate impacts do not disproportionately affect disadvantaged communities and populations.

Emergency Response

The City will apply policies, tools, and training standards to help prepare for and respond to major disruptions resulting from climate change impacts, with the goal of maintaining and quickly recovering critical operations to reduce adverse effects on people, property, and the environment.

Communication

The City will provide standards and guidance for stakeholder outreach and messaging by navigating social and traditional media to reach all populations. Outreach materials should include a basic understanding of the issues, description of the solutions, and an expectation for the level of service possible in a changing environment with competing priorities. Messaging should be science-based, nonpartisan, and transparent with the aim of allowing stakeholders to make informed decisions.

Life's Just Greener Here

Example- 2060 SLR with King Tide

Round Table Discussion

Next Steps

Proposed Benchmark Meeting Dates

Steering Committee Meeting #1 Overview of the Plan	January 19, 2023
Steering Committee Meeting #2 Draft Study Results	February 23, 2023
Public Outreach Meeting #1 Draft Study Results	March 9, 2023
Steering Committee Meeting #3 Draft Report Review	March 23, 2023
Steering Committee Meeting #4 Finalize Draft Report	April 20, 2023
Public Outreach Meeting #2 Present Draft Report to City Commission	May 23, 2023

Thank You For Attending
